

## Invitation to participate in Researchers' Night hybrid

" Researchers are ordinary people with extraordinary jobs"

Welcome to present your research and attend the Science Slam in Vattenhallen, September 24-25, 2021.

To give students from upper secondary school and other interested visitors a picture of what a researcher is and what research means, we would like to invite you to participate in Vattenhallen Researchers' Night. We will offer both physical and online activities. This year's theme is "How will we live in the future?"

Announce if you want to participate physically or digitally. Your digital participation includes a two-minute film with a presentation of yourself and your research through a demonstration, conversation, activity, or experiment.

Sign up for the Science Slam in Vattenhallen! A competition where researchers from Lund University give a popular scientific description of their research. The researcher who gets the most votes of the audience wins and goes on to Lund Research Grand Prix.

During Researcher's Friday, the Young Academy of Sweden organizes the game Expedition Mundus. In this game, the students take on the role of researchers exploring an unknown planet called Mundus. In short, they think like scientists, formulate hypotheses, test them, and then report the results.

### Times during Friday:

Pass 1:	08.30 - 10.00
Pass 2:	10.30 - 12.00
Pass 3:	12.30 - 14.00
Pass 4:	14.30 - 16.00

### Times during Saturday

13.00-14.00
15.00-16.00

Register your participation via email to [stefan.zamudio@vattenhallen.lu.se](mailto:stefan.zamudio@vattenhallen.lu.se) before 6<sup>th</sup> of September. Please also tell us if you want to participate in Science Slam and if you have any food preferences.
