ClimBEco 2018–2020

CLIMBECO GRADUATE RESEARCH SCHOOL

Get skills to address the research dimensions where climate, biodiversity and ecosystem services meet to tackle sustainability challenges in society.

A two-year program where you
- meet and get inspiration from other PhD students and senior scientists
- can join a mentor program about career- and personal development
- present and get feedback on your own research
- choose from a variety of cutting-edge PhD courses and workshops

Apply before 14 May 2018
- For more information and eligibility criteria: www.climbeco.lu.se

Climate, biodiversity and ecosystem services in a changing world.

The ClimBEco Graduate Research School is funded by the strategic research areas BECC and MERGE and the Faculty of Science at Lund University. BECC – Biodiversity and Ecosystem Services in a Changing Climate – is a collaboration between Lund University and University of Gothenburg. MERGE – ModElling the Regional and Global Earth system – is a collaboration between Lund University, University of Gothenburg, Rossby Centre/SMHI, Linnaeus University, Chalmers University of technology and Royal Institute of Technology.
